

January 28, 2016

To All Our Valued ORA Business Partners:

Old Republic Aerospace (ORA) is pleased to announce that Jeffrey Moitozo has accepted the position of Senior Vice President, Product Line/Business Development Manager, effective February 1, 2016, operating out of our New York location. This is a newly created home office position that will report directly to me. Paul Howard will continue to lead our New York branch reporting to Gary Churchill.

Old Republic Aerospace has expanded its capabilities in recent years to include several new product specialties that will benefit from Jeff's expertise and business relationships on a national level. Our expansion into major products, MRO's and other areas that touch on multiple product lines within ORA or potentially other divisions of Old Republic International will require deft execution and coordination to achieve maximum effectiveness. I have confidence in Jeff's skills in these areas having worked closely with Jeff for 12 years at CIGNA Aerospace and later ACE USA.

Since leaving ACE, Jeff has held positions of increasing responsibility at USAIG in New York and then AIG Aerospace, where he rose from Regional Manager to Chief Underwriting Officer – Americas/Aerospace.

Please join me in welcoming Jeff to the Old Republic Aerospace team. He can be reached at 212.607.2625 or jmoitozo@ORaero.com.
